Good morning,

Just emailing in regards to an update on the invoicing side of the system that should be implement immediately.

With Intact Insurance, they take an additional fee from the invoice, and we can not confirm proper invoicing until we confirm the sale, and once we confirm the sale, and the invoices don't match, we can't go back and fix it.

				* The total does not include additional fees.
<input type="button" value="Only invoice parts ready for shipment"/>				

Instead of this screen saying confirm sale, it should be a proceed to next step, and then at that point when the invoice totals are verified, that is when the Confirm Sale button should come into play.
